

## SAVEBEE CRIPOCURRENCY PROJECT

### WHAT IS IT?

SAVEBEE is a Security Token created in the BSC Binance Smart Chain network, which is a decentralized blockchain computing platform dedicated to smart contracts and decentralized applications.

The function of the SAVEBEE Token goes far beyond being a monetary value for exchange like money is. Those who buy it are investing their money in preserving the environment and still receive the potential of financial profit from it.

### The SAVEBEE Project

#### The problem to be solved

Did you know that of 300,000 species of known plants, around 90% depend on the intermediation of another living being for reproduction, and bees are fundamental for the reproduction of these plants, being the most efficient pollinators and the only specialists, to feed exclusively on nectar and pollen.

According to an article published in the journal Science, the number of bees has decreased by almost 50% in North America, and in even more alarming proportions in the rest of the planet.

Bees - wild and domestic - carry out about 80% of all pollination worldwide. A single bee colony can pollinate 300 million flowers a day. Grains are mainly pollinated by the wind, but fruits, nuts and vegetables are pollinated by bees. More than 70 of the top 100 human food crops - which provide about 90 percent of the world's nutrition - are pollinated by bees.

Almost 90% of wildflower species depend on pollinators, as do 75% of food crops.

With global warming, we are witnessing a great destruction of flora, essential for increasingly devastated biomes, increasing all types of environmental damage, since plants are related, among other functions, with the rainfall regime, with the maintenance of the soil and with the guarantee of a healthy environment for the survival of several species. Therefore, by removing the vegetation from an area, we are directly affecting the fauna of that region, triggering very serious ecological imbalance.

Our plan is to promote the protection of bees as important agents for pollination and renewal of wild flora and agricultural areas. There are over 20 thousand species of bees in the world, the vast majority, solitary bees, that is, those that do not live in hives, but are essential for pollination and sustaining the environment. They are crucial for the reproduction of plants, as well as deciding which plants will be prominent in the landscape.

Our mission is to assist in the preservation of bees, through the maintenance of wild forests and support for organic and sustainable agriculture, making our planet a better place to live.

Rev 1.1 - 09/2021

## What is killing the bees?

Bees are dying from a variety of factors, such as pesticides, drought, deforestation, forest fires, nutritional deficits, air pollution, global warming and many others. Many of these causes are interrelated.

## INVEST IN YOURSELF, INVEST ON THE PLANET Help support protection organizations

When you support and invest in SAVEBEE, part of your investment will go to researching sustainable solutions in partnerships with universities and environmental protection organizations, and donations to entities such as GreenPeace, WWF and others, in projects that support our cause.

We will support projects that will be analyzed by project collaborators, biologists, environmental engineers and experts involved with it.

We will invest in projects that help reduce global warming through actions such as reforestation through planting seedlings, direct seeding and agroforestry systems, ecological agriculture and conserving riparian forests. Directly assisting in the restoration of healthy bee populations, there will be an improvement in pollination, which, in turn, improves crop yield and flora support in a natural and efficient way, thereby improving water filtration, oxygen production and control of diseases and pests, creating a virtuous circle.

## SAVEBEE FARM – play to earn

In the second phase of the project, SAVEBEE will launch the first version of our game platform, with play to earn focus, to help raise funds and promote more gains for SAVEBEE investors and supported projects.

SAVEBEE Farm is an online game with a focus on blockchain and bee preservation. The objective of the game is to build a "farm" of bees where players can over time withdraw earnings, where every transaction carried out in the game, a part will be donated to projects for the preservation of bees.

Initially the player makes an investment in SAVEBEE to participate in the game, with this investment he receives a beehive for his farm and HONEYCOMB tokens, to buy the game resources and increase his farm and profits. With this investment the player starts their farm which can be reinvested to increase their production, earn more HONEYCOMB and in the future convert to SAVEBEE.

Over time the game will receive updates with many new features such as NFT bee breeding with special effects and battles to defend the hives.

Part of the tokens generated will be destined to the earn to play platform for the purchase of HONEYCOMB, which are bonus tokens that can be traded between players, or can be used to exchange for more SAVEBEE, always valuing your investment.

## BREAK DOWN

**1 TOKEN SAVEBEE** ESTIMATED VALUE = US\$ 0,00012

**1 HONEYCOMB\*** = 0,001 **SAVEBEE**

\*HONEYCOMB = COIN USED IN SAVEBEE Farm (earn to play)

## CREATION AND DISTRIBUTION

SUPPLY = 200.000.000

PRECISION = 12 DECIMALS

### Support team distribution

To ensure project continuity and continuous improvements, 10% of the generated assets were set aside to be allocated to an active portfolio with multiple subscriptions (“multisig” type subscription). These tokens will be distributed following a sequence of intervals of at least 60 months in order to avoid mass withdrawals from the project.

#### Dev account toal

#### Developer team = 4%

This fund will be for our developers, administrators and marketing team to maintain a full-time focus on the SAVEBEE ecosystem.

We want everyone to continue to build and always improve our community.

This allocation will allow each of the volunteer developers to be compensated for their initial investment in SAVEBEE and will also provide salaries so that they can work exclusively in the SAVEBEE hive for years to come.

## Manager team

### Manager team = 3%

Managers are the business experts who enable the development team to have a trusted group of managers, deployed across multiple channels, to ensure a secure space in which to build community with peace of mind and security.

### Marketing team = 3%

The SAVEBEE ecosystem is even more impressive when you consider that an expert team implements international marketing strategies that will make SAVEBEE a strong name in cryptocurrency, sharing the positions among the most valued cryptocurrencies on the market.

## QUEEN BEES - OUR INVESTORS

Queen bees are responsible for sustaining the project, which are all investors, nature and environmental preservation enthusiasts. 40% of the tokens will be available for sale in the first phase. and 30% in the second phase, with the launch of SAVEBEE Farm. These tokens will be distributed in two distinct phases of the project.

## SAVEBEE FARM - Earn to Play

To feed the SaveBee Farm ecosystem, the HONEYCOMB token will be created, which will give even more stability to SAVEBEE as a currency, allowing users to increase the token's liquidity and generate income through the earn to play platform.

## BURN

**Of the 20% of tokens reserved for burning, 5% will be burned in the first half and the rest in 20 stages.**

## ENVIRONMENTAL SUSTAINABILITY DISTRIBUTION

20% of everything will go to projects that help reduce global warming through actions such as reforestation, planting seedlings, direct seeding and agroforestry systems, ecological agriculture, conservation of riparian forests, social projects to raise awareness to the importance of preserving and restoring degraded areas, using bees as the main pollinating agents, among others.

All supported projects will be described and monitored through the SAVEBEE community in our website <https://savebee.org> and its social networks.

## Market distribution

These tokens will be made available on the market as follows:

### PHASE 1 - Publication for sale on PancakeSwap

03/10/2021

Sale account: 0x442D72c5C22645020D294C836BDE61d2559BCD0f

Total of 50 million tokens.

### PHASE 2 - SAVEBEE FARM (PLAY TO EARN)

Creation of HONEYCOMB rewards and NTFS token for SAVEBEE Farm game

Sale account: 0x442D72c5C22645020D294C836BDE61d2559BCD0f

Total of 50 million tokens.

## Availability on the market

These tokens will be made available on the market as follows:

### PHASE 1

Pre-sale account: `0x442D72c5C22645020D294C836BDE61d2559BCD0f`  
Total 1 million tokens.

Purchase advantages in Phase 1 - Private sale until 09/25/2021  
Minimum amount of 10,000 Tokens  
Required - MetaMask Wallet.

### PHASE 2

Minimum amount of 10,000 Tokens  
Required - MetaMask Wallet.

Publication for sale on PancakeSwap - 10 million tokens will be released at launch and after the sale of this lot, 5 million tokens will be released per cycle (until sold out or every 2 months).

# ROADMAP

- White Paper Version 1.0 (Official Documentation);
- Initial private fundraising;
- Initial advertising on social media;
- Start of pre-sales for total investment in the SAVEBEE ecosystem;

- Public Offering and Official Launch with PancakeSwap Listing;
- First actions with environmental recovery projects;
- Support the development of physical products with the SAVEBEE brand by our community in a decentralized manner;
- Availability of 50 million tokens for sale;
- Content generation through social media with the advertising of partnerships and projects;
- Launch of the first version of the game SAVEBEE Farm (earn to play) with bonus payouts HONEYCOMBS.

- Support selected projects and donations to NGO projects such as GreenPeace, WWF and others;
- Reforestation projects with support from partner companies;
- Social media campaigns in support of organic and sustainable agriculture;
- Twitter campaign to enter Trending Topics with the hashtag SAVEBEE;
- Marketing campaign for the expansion and adoption of SAVEBEE as a sustainable project around the world.

**SAVEBEE reaching the TOP 100 global cryptocurrencies.**

## CONCLUSION

With our actions, we intend to start a process of changing the behavior and mentality of people in the world, starting one by one, like bees, in an organized, firm way and under the leadership of queen bees, here represented by all individuals who participate in the community as investors in an important and relevant project for everyone's future.

**Be part of our community. Do your part for the planet.**
